

Elevated Resin Feed

Product Number

PV-68

Description

Steel coil resin feed wrapped in PRO-VAC Standard-Flow Infusion Mesh (PV-50). This allows the resin feed to be elevated above the part when under vacuum to prevent part imperfections caused by resin feed lines. The steel coil is 16mm (0.629") ID and the infusion mesh allows the spiral to stand 5.1 cm (2") off the part. Maximum use temperature is 120°C (250°F).
